Laurens van den Acker was born in 1965 and studied at Delft University of Technology in the Netherlands. He started his career in 1990 as a designer for Design System SRL in Turin (Italy), before focusing on automotive design starting in 1993. During the course of his career, he worked with Audi, Ford and Mazda. These professional experiences brought him to Germany, the United States and later Japan, making him renowned in his field.

He returned to Europe in 2009, where he took over the management of Groupe Renault's Design department in France.

His first ambition was to create a range of attractive, powerful and coherent vehicles to strengthen the Renault brand and its sales performance.

He expressed his vision through the design of six concept-cars that symbolise the diversity of the Renault offer. Restyled between 2010 and 2013, these vehicles met with considerable success both in the motor industry and with the general public. At the same time, they provided a basis for future production vehicles. The Design department teams renewed their entire range around these vehicles between 2012 and 2016 and integrated the style into new models, namely around 30 vehicles intended to meet the needs of the increasingly international clientele.

Thanks to these efforts, design became, in 2016, the number one selling point of Renault products. That same year, Talisman, the D-segment premium saloon, was voted the "most beautiful car of the year" by the general public at the International Automotive Festival (FAI). Since then, TreZor, a concept-car released at the Paris Motor Show, was awarded three European prizes. In a personal capacity, Laurens van den Acker received the FAI, GQ France and Auto Car awards for "designer of the year 2016".

Under his leadership, the Design department of Groupe Renault now comprises 545 people of 29 different nationalities. It has six production centres across the world and uses state-of-the-art design and digital visualisation techniques.

In addition to the Renault brand, Laurens van den Acker steered the styling development of the group's three other brands: Dacia, Renault Samsung Motors and Alpine.

In October 2009, Laurens van den Acker has been Senior Vice President, corporate design of Groupe Renault and member of the Renault Management Committee.

As for April 1, 2019, he becomes a member of Groupe Renault Executive Committee.

A graduate from Ecole Centrale Paris (ECP 92), **Frédéric Vincent** began his career as IT Manager for the Bouygues Group in Spain. He very quickly turned to multimedia and accompanied the arrival of digital in the audiovisual industry.

From TF1, he moved to TPS where he worked in various IT, technical, audiovisual, new services and marketing fields and where he launched the TPS-paid package. In 2006, when TPS was acquired by CANAL+, he was entrusted with the Development Department of CANAL+, and 3 years later the creation of the Canal Experience Department with the mission of transforming the customer experience. As Technical & Information System Director, he led the digital transformation of the Canal+ Group by developing, through digital technologies, everything related to customers' experience in terms of access and consumption.

Frédéric Vincent joined Groupe Renault in 2016 as Chief Information Officer, drawing on his expertise in the media industry, which was touched by digital early on. He is also Chairman of the Renault Digital subsidiary created on January 1, 2017 and in charge of the Groupe's Digital Transformation. On May 1, 2018, Frédéric Vincent becomes member of the Renault Management Committee. In February 1, 2019, he is appointed SVP, Information Systems and Transformation.

As of April 1, 2019, he becomes member of Groupe Renault Executive Committee.
