## **“TRANSPORT AND MANKIND” SHOW AT CITÉ DES SCIENCES WITH RENAULT**

With a complete range of four electric vehicles accessible to all, together with its “Energy” engines for a continuous reduction of CO<sub>2</sub> emissions and the environmental objective in its 2016 strategic plan, Renault was a natural partner for the permanent exhibition “Transport and Mankind” at the Cité des Sciences museum in Paris.

For five years the museum will be exhibiting a number of innovations aimed at making the switch from short-sighted to sustainable mobility. Representing Renault, Odile Desforges, Executive Vice President, Engineering and Quality, made an opening speech on the company’s technological advances in the transport sector and reasserted the brand’s commitment to sustainable development for all, with people placed at the heart of its strategy. Renault will provide an electric vehicle eco-driving simulator for the show.
