A centre to measure the emissions of the Group's vehicles

February 26, 2008, a centre to measure the emissions of the Group's vehicles has been inaugurated in Douai (France). This centre, fitted with ultra-modern systems, will enable Renault to make sure that its vehicles meet all the standards of the future, and in particular the Euro5 standard. The centre will make sure that the vehicles are compliant when production starts and throughout the series production life cycle. The centre checks the vehicles produced in seven Renault Group plants: SOVAB, Dieppe, Douai, Flins, Sandouville, MCA, Oyak Renault (Turkey). Renault has invested €15 million
