ADAC RELIABILITY SURVEY 2013: RENAULT RESULTS STILL STRONG

The Automobile German ADAC club has just published the results of its annual reliability survey *Pannenstatistik*.

This year, the Renault vehicles are still highly ranked in this external reference survey.

Every Renault model included in the survey continues to be considered "good" or "excellent" while the notations were made stricter by the ADAC this year. All results remain positive, even after 6 years of use, which demonstrates the long-lasting reliability of the Renault vehicles.

"The reliability of our vehicles is a fundamental element, which we are permanently engraving in our genes. We have to pursue more than ever our efforts to guarantee the satisfaction of our customers all around the world " comments Jean-Pierre VALLAUDE, Senior VP Quality.
