## HYVIA AND HYSETCO JOIN FORCES TO ACCELERATE HYDROGEN MOBILITY

*Renault Master Van H2-TECH at the HYSETCO refueling station, Porte de la Chapelle, Paris, France.*

At the Hyvolution 2023 exhibition, HYVIA and HYSETCO announce that they are joining forces to accelerate the development of hydrogen mobility for light commercial vehicles.

- HYVIA and HYSETCO are developing a new cooperation which aims at:
  - The improvement of **the customer experience** of HYVIA light commercial vehicles users in the public H2 refueling stations of the HYSETCO network.
  - The study of an **integrated offer** of HYVIA commercial vehicles to be proposed by HYSETCO, including the vehicle, the associated services, and the supply of hydrogen.
  - **Complementary services** proposed by HYSETCO for HYVIA light commercial vehicle customers.
  - HYVIA's support for **the development of HYSETCO's network** of public H2 stations.
- This cooperation is based on the complementary nature of HYVIA and HYSETCO's offers:
  - HYVIA, a joint venture dedicated to hydrogen mobility, offers an ecosystem of solutions including **a range of H2 light commercial vehicles** (van, minibus, chassis cab) and **private H2 refueling stations** for its professional customers.
  - HYSETCO, the leading company in light hydrogen mobility in France, develops and operates **public H2 refueling stations** and offers **integrated solutions** to facilitate access to hydrogen mobility for professionals.

*"Strongly committed to the hydrogen industry since its creation in June 2021, HYVIA continues in 2023 the deployment of its unique and complete ecosystem dedicated to hydrogen mobility. This collaboration with HYSETCO allows us to go even further to support our professional customers, in order to offer them even more refueling solutions and services."*

**David Holderbach, President HYVIA**

*"We are very pleased with this initiative between HYVIA and HYSETCO, which will enable us to offer our professional customers the best solutions to facilitate their transition to zero-emission hydrogen mobility, on a range of commercial vehicles. HYSETCO, the leader in light hydrogen mobility, confirms its commitment to contribute today and tomorrow to pollution-free cities."*

**Loïc Voisin, President HYSETCO**

**About HYVIA**

"HY" for hydrogen, "VIA" for road: HYVIA paves a new way forward for carbon-free mobility, with hydrogen mobility solutions. Created in June 2021, HYVIA is a joint venture equally owned by Renault Group, a dominant player in the automotive industry, and Plug, a world leader in turnkey hydrogen and fuel cell solutions. Based in France, for European markets, HYVIA offers a complete and unique ecosystem that includes light commercial vehicles with fuel cells, hydrogen refueling stations, supply of carbon-free hydrogen, services for financing and maintenance of fleets.

**About HYSETCO**

HYSETCO is a pioneer in hydrogen mobility that has developed a unique positioning with the first hydrogen refueling infrastructure network in France and an integrated offer including the hydrogen vehicle and associated services. In 2022, HYSETCO distributed more than 100 tons of hydrogen to its customers.
