PREVENTION OF PSYCHO-SOCIAL RISKS

Two years after the first edition, Renault is launching a new survey with Technologia of employees at its engineering sites in France, including the Technocentre. The survey will enable the company to review initiatives on the prevention of psycho-social risks (change in working hours, reorganization of HR teams, training on detecting people in difficulty). These initiatives are presented as good practices by the French labor ministry on its website, travailler-mieux.gouv.fr.
