

Renault Group joins EONA-X to create a space for sharing data in mobility, transport and tourism

- Renault Group has become a founding member of the EONA-X association alongside ADP, Air France-KLM, Aéroport Marseille Provence, Amadeus and SNCF, with the Apidae Tourisme platform as an active member.
- This entity - born in the continuity of the Gaia-X European initiative - aims to federate the tourism, mobility and transport players and to create a space for sharing their data, thus enabling the development of new use cases related to mobility.
- The first use case concerns multimodal mobility.

Boulogne-Billancourt, September 5, 2022 - Renault Group announced today that it has joined the EONA-X association as a founding member - born in the continuity of the European Gaia-X initiative - alongside ADP, Air France-KLM, Aéroport Marseille Provence, Amadeus and SNCF, with the Apidae Tourisme platform as an active member. The ambition of EONA-X is to federate the mobility, transport and tourism sectors by promoting the circulation of their data. The ultimate goal is to create a federated catalog of secure data that complies with the European framework, enabling the development of use cases that meet the challenges of people mobility.

Within EONA-X, Renault Group, the association's first car manufacturer, will be able to share and receive data in an environment of trust, sovereignty and data control. New use cases will be tested and developed, both on its own and shared with other members, leading European players in mobility. Among the many use cases explored, Renault Group and the members of the association will notably work on multimodal mobility.

« Renault Group is joining the EONA-X initiative today as a founding member. This is further proof of the group's determination to place innovation at the heart of its strategy and in particular its mobility services. By joining forces with major European players in the mobility, transport and tourism sectors, Renault Group - and its entities such as Mobilize - will benefit from quality data to develop new use cases and will make theirs available in a secure European environment. The group will thus participate in the construction of the next generation of infrastructure, but also in the definition of the EONA-X specifications for the automotive sector », explains **Frederic Vincent, EVP Information systems and Digital, Renault Group.**

« EONA-X is pleased to welcome Renault Group as a founding member of the association. We share the same vision of innovation to develop tomorrow's mobility; including sustainability, accessibility and safety issues, with the will to be a champion of digitalization and data exchange. We would like to thank the Renault Digital and EONA-X teams who contributed to this membership », adds **Jean-François Cases, President of EONA-X and VP & Associate General Counsel, Amadeus.**

About Renault Group

Renault Group is at the forefront of a mobility that is reinventing itself. Strengthened by its alliance with Nissan and Mitsubishi Motors, and its unique expertise in electrification, Renault Group comprises 4 complementary brands - Renault, Dacia, Alpine and Mobilize - offering sustainable and innovative mobility solutions to its customers. Established in more than 130 countries, the Group has sold 2.7 million vehicles in 2021. It employs nearly 111,000 people who embody its Purpose every day, so that mobility brings people closer. Ready to pursue challenges both on the road and in competition, Renault Group is committed to an ambitious transformation that will generate value. This is centred on the development of new technologies and services, and a new range of even more competitive, balanced and electrified vehicles. In line with environmental challenges, the Group's ambition is to achieve carbon neutrality in Europe by 2040.
