

**World premiere: The Software République will unveil their concept car  
"H1<sup>st</sup> vision" incorporating over 20 French innovations  
on 14 June at VivaTech**

- The Software République will reveal, in a world premiere, its vision of the mobility of the future through its concept car integrating more than 20 innovations.
- Called H1<sup>st</sup> vision ("Human first vision"), this concept car and its ecosystem are committed to placing people at the heart of a more intelligent and secure mobility.
- Discover H1<sup>st</sup> vision with its unique experiences for drivers, passengers, and road users at the VivaTech booth J10, from 14 to 17 June.
- H1<sup>st</sup> vision reflects the unique collaboration of this consortium of French technology companies. It will be unveiled on 14 June at 10am by the CEO of the Software République.

Paris, 23 May 2023 – For the second year running, the Software République will be at VivaTech. This year, it will present a collaborative concept car integrating the complementary expertise of 12 partners (founding members Dassault Systèmes, Orange, Renault Group, STMicroelectronics and Thales; with Arkamys, Compredict, Epicnpoc, Eyclights, JCDecaux, Kardome and Stern Tech).

Driven by the common vision of a safer and more intelligent mobility of tomorrow, the Software République has developed the H1<sup>st</sup> vision ("Human first vision") concept car integrating more than 20 innovations for new experiences. Illustrating the idea of "take care of me, take care of you, take care of us", its functional and concrete solutions will be able to address both car and road users.

*« H1<sup>st</sup> vision is more than a concept car, it is both a live and a virtual experience, it is real. 20 experts from the 12 companies involved in the project will help you discover our horizontal cooperation ecosystem via this first unique collaborative concept car and its virtual twin. »* explained Eric Feunteun, Software République Chief Operating Officer.

**About the Software République:**

The Software République is defined as an open innovation ecosystem dedicated to intelligent, secure, and sustainable mobility. It was created in April 2021 by six founding members: Atos, Dassault Systèmes, Orange, Renault Group, STMicroelectronics and Thales. The Software République builds collective businesses focused on tomorrow's mobility through its unique horizontal collaboration model. The ecosystem stands out for its innovative approach, combining established companies and start-ups from different backgrounds to bring to market products and services that meet the new challenges of the connected vehicle, the smart city and energy. These projects are based on the complementary expertise of its partners in data analysis, artificial intelligence, cybersecurity, connectivity, and digital twins, and on the ambition to invent a new model of innovation while keeping people and the environment at the heart of its motivations.
