

BIOGRAPHY

Philippe Boisvert – Direct Sales and Hydrogen Solutions Director, HYVIA

Born in 1986 in Montreal (Canada), Philippe Boisvert holds a mechanical engineering degree from McGill University as well as a Master of Business Administration (MBA) from the State University of New York. Philippe Boisvert joined Plug Power in 2011 as a Senior Project Manager where he managed the deployment of hydrogen fuel cell systems. In 2013, he takes the new role of Director, Hydrogen Energy Systems where he develops the first generation of hydrogen refueling solutions for Plug Power. In 2016, he joins the commercial team as Director, Global Field Application Engineering where he develops and adapts Plug Power products for new markets and applications in addition to supporting the global salesforce as subject matter expert. In this role, Philippe lead the conception and development of hydrogen systems in Chili, South Africa, Japan, Korea, Australia as well as across Europe and North America.

Philippe Boisvert joins HYVIA as Direct Sales and Hydrogen Solutions Director.
